OBJECTIVE

My objective as a web developer is to utilize my skills and knowledge to build innovative and effective websites that will help your company achieve its business goals. I am committed to staying up-to-date with the latest web development trends and technologies, and I am always eager to learn new skills.

EXPERIENCE

online ordering restaurant app

-

project Demo: https://my-portfolio-pi-eight-36.vercel.app/

The online ordering restaurant website is a Next.js project that utilizes several features to make ordering from restaurants easier and more efficient. The website offers authentication using next-auth, utilizes redux-toolkit to navigate data and utilizes cookies to save data. In this case study, we will explore the features of the website and how they contribute to an excellent user experience.

The primary goal of the online ordering restaurant website is to provide a seamless user experience for ordering food online. The website achieves this by offering features such as authentication, data navigation and storage, and a responsive design.

Node-js e-commerce app

-

Demo: https://node-js-e-commerce-app.onrender.com

this app one of my best and that let me get real-world job experience and most functionality project. i
use html, css and
bootstrap
for frontend and node js, express and mongodb for backend and i also use stripe to
accept payment. and it has different interface for user, none user and admin and i add authentication
and many more

EDUCATION

I do not have a formal degree in web development. My commitment to continuous learning and self-improvement has enabled me to develop a strong portfolio of work and the ability to solve complex problems.
